

# Expression of Interest Form

**Name:** Joshua Son

**Student ID:** 1388288

**BCIS Major:** Computer Science

---

**Name of preferred project:**

LuminAR (Luminar Technology)

**Preferred role(s):**

Team member - Researcher, Quality Assurance, Algorithm Design and Algorithm Analysis.

**Rationale:**

Augmented Reality is a field I have been interested in and I'd love to be more exposed to in our studies. With the latest craze of Google Glass, augmented reality is becoming a popular hype in the technological world. AR is a relatively new field and as a computer scientist, I am interested in how the system works and whether there are better, more efficient ways of achieving the same model. I also have an interest in mobile technology, photography and latest electronic gadgets/apps.

I'm a positive team member who likes to take on new challenges. I have worked in various roles, in numerous teams throughout my tertiary education - almost one team project per paper - cooperating with others to produce work of high standards. My previous work experience in fast food relied heavily on working in a positive team environment, to deliver quality services.

---

**Alternatives:**

**Alternative 1:** HTML mock up tool (Exium)

**Alternative 2:** Fresh Facts - an app (Plant & Food Research)

---

**Employment:** Currently unemployed

**Notes:**

I'd like to have the pleasure of working with Jason Gerbes (1274664) again, if possible.
